

NOVOGENESIS: Acentric Cosmology

Earth/ Nature shares its portion of cosmic centrality in life's each iteration. The transformative experiences of life/ death are Divine Communications — [DIVINICOM](#).

Birth and death are less about corruption than about regeneration, growth into understanding, human and divine, ascendant consciousness, community.

The [Evolution of Symbiosis](#) is the Divine Way with life in nature. Authentic human ascendancy comes in the consciousness of faith/ reason working mutually in *Com-Munity* (shared responsibility). The altruism of communication-shared experience and growth in consciousness unfold the reality of Eucharist, the compassionate realization that authenticity is transferable in altruistic consciousness, and soul is inter-generationally transferable.

NOVOGENESIS is creation-in-process; **METAGENESIS** is consciousness-in-process; and **THEOGENESIS** is conscious Godlikeness-in-process. Every thought, every word, every work is coached in Wisdom-brought-forward. Every person, every dream, every plan is part and parcel of “new genesis”, new self-consciousness, new divinity-consciousness in-process; but fixation in dualism, centrism and sexism, is made dogma in medieval culture, and still obtains. People cannot in good conscience be made fodder to institutional commercialism, the proxy theology justifying mindless exploitation of people and nature, the commercial theology/ politics of The Councils of Trent and the First Vatican. People not institutions do consciousness, do religion, do theology; these come from the Truth/ Beauty of creative nature's Deep Poetry intuitionally conscious in all, the root sense of [Divinity Consciousness](#).

I. Evolving NOVOGENESIS — Communication-Based Faith

Commercial vs. Non-Commercial: Commercial motives, unlike distributed motives of acentric cosmology, are exploitive, self-focused and motivated in profit; altruistic motive is focused on other as much as focused on self. Commercial/ personal success suppose personal/ communal success; what this says is that mutual trust is the basis for personal/ communal success, that the commercial has to be other-focused not seeking to exploit in self-interest only, but equally in other interest. Faith supposes trustworthy communication, the win-win process of personal/ communal progress.

1. Word
2. Thought
3. Insight
